

Model manuscript of a draft amendment

The model manuscript shown on the following pages demonstrates the instructions for preparing draft amendments. Although it has been prepared using the ISO template, it is not designed to show how to use the template but rather to illustrate compliance with editorial rules.

It is not a real DAM manuscript. The text has no technical significance.

It is intended as a complement to the Model manuscript of a draft International Standard (Ref. MODDIS_E.PDF/Version 1.2) and constitutes an imaginary draft amendment to the International Standard, when published.

It should be noted that it is only possible to prepare an amendment to a published standard.

Although it is based on an International Standard from one particular Technical Committee, this model of a draft amendment is applicable to all Technical Committees.

The text of the manuscript is shown on the right-hand pages, printed in black. The instructions and/or comments are on the facing pages, printed in blue.

The title page of an enquiry draft will be prepared by the ISO Central Secretariat. (The page shown here has been prepared using the ISO template.)

Give the title of the standard to which the amendment applies.
It is recommended to give a title to the amendment.

For ease of traceability, it is advisable to indicate on the cover page all administrative information relative to the document as well as details of the electronic file.

Cereals and pulses — Specification — Part 1: Rice

AMENDMENT 1

Recommendations relating to storage and transport conditions

Céréales et légumineuses — Spécifications — Partie 1: Riz

AMENDEMENT 1

Recommandations relatives aux conditions d'entreposage et de transport

Type of document: International Standard

Sub-type of document: Amendment

Stage of document: (40) Enquiry

Language of document: E

Reproduction may be subject to royalty payments or a licensing agreement.

Violators may be prosecuted.

All amendments shall have a foreword. It shall not contain requirements, figures or tables.

Include this standard text.

In addition to the standard text, give the number and the year of publication of the standard being amended, the designation and name of the committee and subcommittee that prepared the amendment, together with the following, if appropriate:

- an indication of any other international organization that has contributed to the preparation of the amendment;
- the relationship of the amendment to other standards or other documents.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Amendment 1 to International Standard ISO 17301-1:1997 was prepared by Technical Committee ISO/TC 34, *Agricultural food products*, Subcommittee SC 4, *Cereals and pulses*.

Indicate the page and the element concerned of the standard being amended.

Specify what the amendment does; use the imperative (“replace”, “delete”, “add”).

Note that the status of the new annex C is not shown in the foreword of the amendment but is given as a modification of the foreword of the standard being amended.

Cereals and pulses — Specification — Part 1: Rice

AMENDMENT 1

Recommendations relating to storage and transport conditions

Page iii, Foreword

Replace the last sentence with the following:

“Annexes A and C are for information only.”

Page 3, subclause 4.2

Delete note 1 and renumber the two subsequent notes as 1 and 2.

Page 3, Table 1

In the column “in milled rice (non-glutinous)”, replace the value “0,3” for “paddy” with the value “0,5”.

Page 4, clause 7

Add the following paragraph at the end of the clause:

“Annex C gives recommendations relating to storage and transport conditions.”

Page 9

Add the following annex before the Bibliography.

Annex C (informative)

Recommendations relating to storage and transport conditions

Containers of rice should be stored in covered premises, well protected from the sun, rain and excessive heat.

The storeroom should be dry, free from unpleasant odours and protected against entry of insects and other vermin. Ventilation should be adjusted in such a way as to give good ventilation during dry weather and to be fully closed under damp conditions. Suitable provisions should be made for fumigation of storerooms.

Containers should be handled and transported in such a way that they are protected from the rain, sun or other sources of excessive heat, unpleasant odours and any other contamination (especially in the holds of ships).
